G-Valley Fourth Industrial Experience Center

A future-oriented innovative technology experience center

”

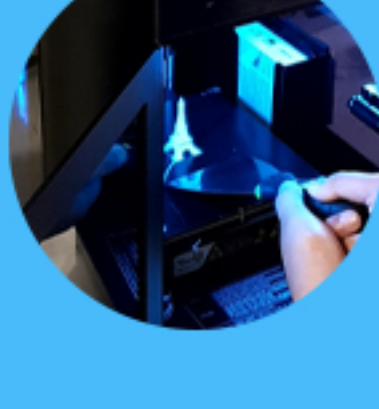

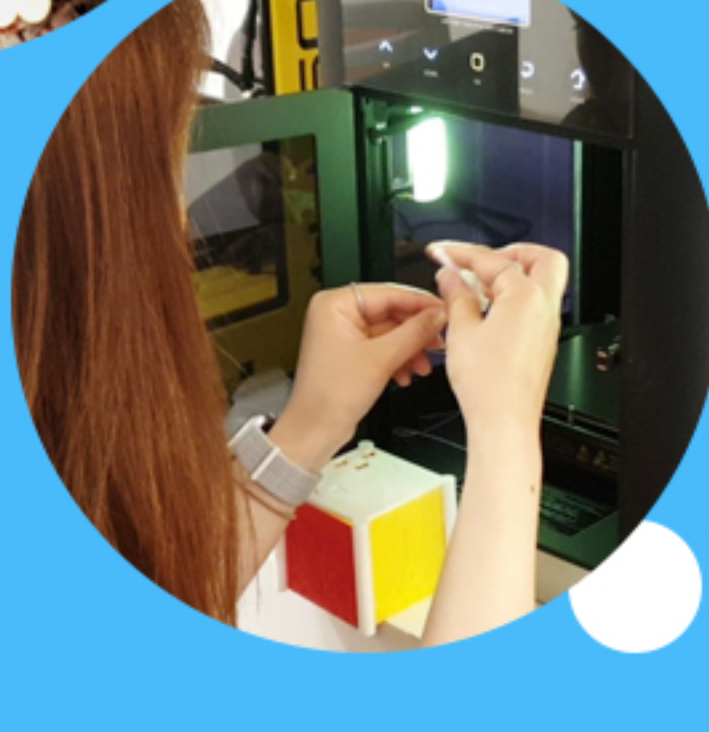

HYPERC

IT

The Fourth Industrial Revolution is based on hyperconnectivity and super-intelligent technology, such as cutting-edge IT, the Internet of Things, artificial intelligence, drones, and more.

And ever since its mentioning at the 2016 World Economic Forum (WEF), society and technology have been evolving at an increasingly rapid pace.

The G-Valley Fourth Industrial Experience Center

provides a series of hands-on programming to enable visitors to better understand and experience first-hand the innovative technology that will lead us into the future.

ARTIFICIAL IN

Please Note!

Fashion apparel, medical devices, lifestyle accessories, and other SME-based items are displayed inside the experience center, so be sure to stop on by after participating in the program.

In addition, G-Valley is the biggest industrial complex of its kind in Seoul. It is categorized as a semi-industrial area and is home to about 9,000 different businesses with focused operations on the Fourth Industrial Revolution, IT, and more.
